Full-Coverage Restorations

ANTERIOR CROWN PREPARATION

- 1.0-mm reduction at gingival margin
- 1.5-mm lingual contact clearance
- 1.5-mm to 2.0-mm incisal reduction
- 1.5-mm to 2.0-mm incisal reduction

3-UNIT BRIDGE PREPARATION

- Rounded internal line angles
- Butt joint margin
- 1.0-mm reduction at gingival margin
- 1.5-mm axial reduction
- 1.5-mm to 2.0-mm incisal reduction

Veneers

VENeer PREparation
A medium grit, round-ended, diamond bur is used to remove a uniform thickness of facial enamel by joining the depth-cut grooves.

INCISAL PREPARATION
The diamond bur is angled to bevel back the incisal edge.

CHAMFER MARGINS
Correct preparation of the chamfer margins interproximally allows the appropriate bulk of porcelain.

*Please note: For additional masking capabilities and/or layering techniques, further reduction may be necessary. Contact your laboratory for further information.

3-Unit Bridge Restorations

**3-UNIT BRIDGE PREPARATION**

When layered or pressed ceramic margins are preferred in conjunction with a zirconia framework, enhanced gingival esthetics can be achieved with a definitive 90 degree shoulder preparation.
